SUPERIOR CLEANING!

Flossing Bristles™ Provide Superior Cleaning

With its revolutionary bristle design, the Mouth Watchers Antibacterial Toothbrush is the first and only toothbrush to properly clean areas where bacteria most often lives. In addition to a bed of thicker bristles for stability and power, the advanced Flossing Bristles™ access the central fossa area of a tooth (the central region with ridges and grooves where 90% of cavities occur) between the gum and tooth) to brush away cavity and gingivitis causing food and plaque build up.

NEW!**

**CLINICALLY PROVEN
TO PREVENT AND
TREAT BAD BREATH
FOR 12 HOURS**

MEDA has just launched a new, breath-rinse called 'CB12', which eliminates and prevents bad breath.

The product, which contains a combination of zinc and chlorhexidine, has a long lasting - 12 hour - effect on bad breath thanks to its chemical make-up, which results in CB12 binding to the oral mucosa, teeth and tongue where it works to neutralise bad breath.
